

quarry sites

We operate a network of quarries and a rail depot which between them provide customers with a comprehensive range of aggregates covering Wiltshire, Oxfordshire, Gloucestershire, Dorset and other neighbouring counties.

The sites are:

- **Bowling Green/Chinham Farm Quarry** – near Faringdon
- **Calne Quarry** – near Calne
- **Cerney Wick Quarry** – near Cirencester
- **Mortimer Quarry** – near Reading
- **Royal Wootton Bassett Rail Depot**
- **Shorncliffe Quarry** – near Cirencester
- **Upwood Quarry** – near Oxford
- **Woodsford Quarry** – near Dorchester

The Calne, Shorncliffe, Woodsford and Upwood operations also include ready-mixed concrete plants.

These sites are also able to supply a comprehensive range of aggregates – sand, gravel, limestone, ballast for concrete, decorative aggregates and screened topsoil. It means that we are an ideal source of aggregate for every need, from construction through to more specialised needs for end-uses such as sports and leisure applications, agriculture, landscaping and gardening.

Whilst several of the quarry sites are licensed for the tipping of inert materials, we also have dedicated facilities for disposal of hazardous and non-hazardous wastes through our sister company, Hills Waste Solutions Ltd.
